

Purpose

The disclosures in this document are made by AIG Asia Pacific Insurance Pte. Ltd. (“**AIG API**” or the “**Company**”) pursuant to the requirements in MAS Notice 124.

30 June 2016

American International Group, Inc. (AIG) is a leading global insurance organization. Founded in 1919, today we provide a wide range of property casualty insurance, life insurance, retirement products, mortgage insurance and other financial services to customers in more than 100 countries and jurisdictions. Our diverse offerings include products and services that help businesses and individuals protect their assets, manage risks and provide for retirement security. AIG common stock is listed on the New York Stock Exchange and the Tokyo Stock Exchange.

AIG is the marketing name for the worldwide property-casualty, life and retirement, and general insurance operations of American International Group, Inc. For additional information, please visit our website at www.aig.com. All products and services are written or provided by subsidiaries or affiliates of American International Group, Inc. Products or services may not be available in all countries, and coverage is subject to actual policy language. Non-insurance products and services may be provided by independent third parties. Certain property-casualty coverages may be provided by a surplus lines insurer. Surplus lines insurers do not generally participate in state guaranty funds, and insureds are therefore not protected by such funds.

Additional information about AIG can be found at www.aig.com | YouTube: www.youtube.com/aig | Twitter: @AIG_LatestNews | LinkedIn: www.linkedin.com/company/aig

AIG Asia Pacific Insurance Pte. Ltd. (CRN. 201009404M)

Company profile

The Company is incorporated and domiciled in Singapore. The address of its registered office is 78 Shenton Way, #09-16, Singapore 079120.

The Company's immediate and ultimate parents are AIG APAC Holdings Pte. Ltd. (incorporated in Singapore) and American International Group, Inc. ("AIG") (incorporated in the United States of America) respectively.

The Company is established as a general insurance company, licensed under the Singapore Insurance Act, (Cap 142). It commenced general insurance business with effect from 1 January 2011.

The Company is a member company of the AIG Inc. group of companies. The AIG API Group consists of the Company and its following subsidiaries in the Asia Pacific region.

- AIG Australia Limited
- AIG Insurance Hong Kong Limited
- PT AIG Insurance Indonesia
- AIG Korea Inc.
- AIG Malaysia Insurance Berhad
- AIG Re-Takaful (L) Berhad
- AIG Insurance New Zealand Limited
- AIG PNG Limited
- AIG Philippines Insurance Inc.
- AIG Taiwan Insurance Co. Ltd
- AIG Insurance (Thailand) Public Company Limited
- AIG Vietnam Insurance Company Limited

The Company is currently assigned an "A+/Stable" credit rating from Standard & Poor's. The Company aims to maintain its "Core" status, as assigned by Standard & Poor's.

Nature of business

The AIG API Group is a multiple line insurance group writing substantially all lines of property and casualty insurance in the Asia Pacific region. Major lines of insurance written include commercial, personal & consumer, accident & health, and specialty coverage.

AIG is a leading provider of insurance products for commercial, institutional and individual customers through one of the world's most far-reaching property casualty networks. AIG offers one of the industry's most extensive ranges of products and services, through its diversified, multichannel distribution network, benefitting from its strong capital position.

We earn revenues primarily from insurance premiums, income from investments and advisory fees.

Our operating expenses consist of claims incurred, commissions and other costs of selling and servicing our products, and general business expenses.

Our profitability is dependent on our ability to price and manage risk on insurance products, to manage our portfolio of investments effectively, and to control costs through expense discipline.

General description of key products

Commercial Insurance Product Lines

Casualty: Includes general liability, commercial automobile liability, workers' compensation, excess casualty and crisis management insurance. Casualty also includes risk management and other customized structured programs for large corporate customers and multinational companies.

Property: Includes industrial, energy-related and commercial property insurance products, which cover exposures to man-made and natural disasters, including business interruption.

Specialty: Includes aerospace, environmental, political risk, trade credit, surety and marine insurance, and various product offerings for small and medium sized enterprises.

Financial: Includes various forms of professional liability insurance, including directors and officers (D&O), fidelity, employment practices, fiduciary liability, cyber risk, kidnap and ransom, and errors and omissions insurance (E&O).

Consumer Insurance Product Lines

Accident & Health: Includes voluntary and sponsor-paid personal accidental and supplemental health products for individuals, employees, associations and other organizations. It also includes a broad range of travel insurance products and services for leisure and business travellers.

Personal: Includes automobile, homeowners and extended warranty insurance. It also includes insurance for high-net-worth individuals (offered through Private Client Group), including umbrella, yacht and fine art insurance, and consumer specialty products, such as identity theft and credit card protection.

External environment

Regulatory framework

Regulators are primarily interested in protecting the rights of policyholders and monitoring them closely to ensure that the AIG API Group is satisfactorily managing its affairs for their benefit. At the same time, regulators are also interested in ensuring that the AIG API Group and the Company maintain an appropriate solvency position to meet unforeseen liabilities arising from economic shocks or natural disasters.

The operations of the AIG API Group are subject to regulatory requirements within the jurisdictions in which it operates. Such regulations not only prescribe approval and monitoring of activities, but also impose certain restrictive provisions, such as capital adequacy requirements, to minimise the risk of default and insolvency on the part of insurance companies to meet unforeseen liabilities as these arise.

The Company is subject to regulatory supervision by the Monetary Authority of Singapore.

Competition

Operating in a highly competitive industry, AIG competes for business with the foreign insurance operations of large global insurance groups and local companies in specific market areas and product types.

Insurance companies compete through a combination of risk acceptance criteria, product pricing, service and terms and conditions. AIG distinguishes itself in the insurance industry primarily based on its well-established brand, global franchise, financial strength and large

capital base, innovative products, expertise in providing specialized coverage and customer service.

We serve our business and individual customers on a global basis — from the largest multinational corporations to local businesses and individuals. Our clients benefit from our substantial underwriting expertise and long-term commitment to the markets and clients we serve.

Objectives and Strategies

Business Strategy

Growth and Business Mix: Grow higher value business to increase profitability and expand in attractive growth economies.

Underwriting Excellence: Enhance risk selection and pricing to earn returns commensurate with the risk assumed.

Claims Best Practices: Improve claims practices, analytics and tools to improve customer service, increase efficiency and lower the loss ratio.

Operating Expense Discipline: Apply operating expense discipline and increase efficiencies by taking full advantage of our global footprint.

Capital Efficiency: Enhance capital management through initiatives to streamline our legal entity structure, optimize our reinsurance program and improve tax efficiency.

Investment Strategy: Execute our investment strategy, which includes increased asset diversification and yield-enhancement opportunities that meet our capital, liquidity, risk and return objectives.

Corporate Governance and Management Controls

Key Features of Corporate Governance framework

The Company's corporate governance framework is established to meet regulatory requirements and ensure there is proper governance and oversight by the Directors over the operations, business affairs, internal controls, and risk management of the Company. The Board provides strategic direction to the Company. It is responsible for the long-term success of the Company and works with the management to achieve this objective.

The Directors of the Company currently in office are:

- Mr Wendell Dave Dowrich (Chairman)
- Mr Michael Stephen Bishop *
- Ms Isabella Loh Wai Kiew *
- Mr Shirish Apte *
- Ms Pamela Yeo Suan Imm
- Mr Matthew James Harris
- Mr John Michael McPhee
- Mr Rudolf Hayo Spaan
- Mr Stephen Charles Snell

* Independent Directors

The following Board Committees assist the Board in executing its duties:

- Audit Committee
- Risk Management Committee
- Nominating Committee
- Remuneration Committee

These committees have been constituted with clear Board-approved written terms of reference. The Board and Board Committees also monitor the operations, business affairs, internal controls and risk management of the companies within the AIG API Group.

[Audit Committee \("AC"\)](#)

The AC assists the Board in discharging its responsibilities to ensure the integrity of the Company's financial statements. It reviews the adequacy and effectiveness of the Company's external and internal audit functions. The AC also reviews the adequacy of the internal financial controls, operational and compliance controls, risk management policies and systems established by the management (collectively "internal controls") of the Company.

[Risk Management Committee \("RMC"\)](#)

The RMC assists the Board in carrying out its enterprise risk management oversight responsibilities including overseeing the establishment and operation of the risk management system and the adequacy of the risk management function of the Company.

Nominating Committee (“NC”)

The NC reviews and makes recommendations to the Board and the board of its subsidiaries on the appointments, re-appointments and retirement of Directors and Board Committee members of the Company, and directors of its subsidiaries respectively. It also makes recommendations to the Board and the boards of its subsidiaries on the appointments of senior executives. The NC assists the Board in setting up and performing a yearly formal assessment of the effectiveness of the Board and its Board Committees.

Remuneration Committee (“RC”)

The RC reviews and ensures that the Company implements formal and transparent procedures for developing policies on executive remuneration and for fixing the remuneration packages for its senior executives. It makes recommendations to the Board and the board of its subsidiaries on the remuneration packages for its senior executives and independent directors.

In addition, the following management committees, which report to the Board/Board Committees, support in the implementation of policies, review of risk profile and management of investment activities of the Company:

- Risk and Capital Committee
- Information Technology Service Review and Risk Management Committee
- Investment and Asset Liability Management Committee

Key Features of Management Controls

The Chief Executive of the Company, together with his senior leadership team, forms the Executive Committee (“Exco”) of the Company. The Exco is responsible for the operations, strategies and business affairs of the Company as well as for establishing and maintaining adequate controls over its operations.

AIG has established group-wide policies to ensure a consistent control framework is adopted across the AIG group of companies. The Company leverages on these policies and adapts them for local implementation to ensure consistency and compliance with local regulatory requirements. Compliance with these established policies and procedures are measured and monitored through reporting from the business to the management committees both in the Company and at the regional level and ultimately, to the Board and Board committees. Independent oversight and assurance is provided through the Internal Audit Department.

Enterprise Risk Management Framework

Overview

Risk management is an integral part of managing our businesses. It is a key element of our approach to corporate governance. We have a Risk Management integrated process for managing risks throughout the organization. Our Enterprise Risk Management (ERM) framework provides senior management with a consolidated view of our major risk positions.

Risk Governance Structure of the Company

The Company's risk governance structure has two distinct levels of committees:

- Board Committees; and
- Company's management committees (and sub-committees).

The role of the RMC is to assist the Board in carrying out its enterprise risk management oversight responsibilities. This includes overseeing the establishment and operation of the Company's risk management framework and the adequacy of the risk management function. The RMC ensures, amongst other things, that its risk management function has independent reporting lines and is sufficiently resourced to monitor all sources of risks.

Aside from the RMC, the Board Committees described under "Corporate Governance and Management Controls" also exercise oversight over the operations of the Company and consider risks and risk mitigating measures in their respective areas of oversight.

The management committees of the Company include the following:

- The **Risk and Capital Committee ("RCC")**, which is responsible for managing the risk profile of the Company. The RCC reports to the RMC.
- The **Information Technology Service Review and Risk Management Committee ("ITSRC")**, which is responsible for reviewing the services rendered by the Information Technology ("IT") department to ensure alignment to service level objectives. The ITSRC maintains oversight of the IT Risks to analyse business impact and associated remediation plans. It also tracks and reviews the progress of IT-related compliance and audit programs. This committee reports to the RCC.
- The **Investment and Asset-Liability Management Committee ("IC")** is responsible for establishing and reviewing policies governing investment activities. The Committee provides oversight of investments and investment activities, and introduces / monitors investment strategies and performance.

The Board approves the Company's risk management policies and meets regularly to review and approve any commercial, regulatory and organisational requirements of such policies. These policies define the Company's identification of risk and its interpretation.

Risk Appetite, Identification, and Measurement

Risk Appetite Framework

We have a documented Risk Appetite Statement which forms an important element of our Risk Management Framework. The risk appetite measures are developed through stress testing and are consistent with the AIG API Group Risk Appetite framework.

Identification of risks is done through various sources within the Company. Risk workshops, process reviews, and Risk Committee Meetings are some of the methods used to identify risks. We also leverage on the AIG Global and Regional risk meetings which foster collaboration between the various regions in identifying risk.

Our risk governance framework is based on the “Three Lines of Defence” model. This facilitates and encourages risk identification at all levels within the Company:

- **First Line:** The Business Operations
- **Second Line:** The Oversight Functions
- **Third Line:** Independent Assurance Functions

We maintain a risk profile for the key risks within the Company. The key risks are measured and monitored on an ongoing basis. On a quarterly basis, these risks are reported to the RMC, RCC and ITSRC.

Asset-liability management

Our objective is to maintain an investment portfolio with assets having weighted average durations that are matched to the duration and cash flow profile of our liabilities, to the extent practicable.

There are no asset-liability management disclosures at a segmented level as we are not required to provide segment information under the accounting standards.

Risk Exposures

An understanding of the interaction between capital adequacy and risk

The Company has defined its risk appetite around three measures of risk:

- Capital Adequacy Measure
- Liquidity Measure
- Variance Plan Metrics

The Company has a conservative risk appetite, in that it maintains prudent levels of capital and liquidity, and engages in a limited range of business activities that generally exclude high risk activities.

Capital Adequacy Measure

The Company aims to ensure that its Capital Adequacy Ratio (“CAR”) remains above the regulatory supervisory minimum CAR at all times and has no appetite for the CAR to fall below this level. The Company’s capital management process focuses on planning for its capital requirements to support the strategic business direction of the Board, whilst providing sufficient buffer above the regulatory supervisory minimum. In this regard, the Company has implemented the thresholds below for managing its capital.

- **Baseline Capital Range:** The range that the Company will maintain during the ordinary course of business. Generally, the Company will distribute any excess capital above the target capital range, subject to applicable Board and regulatory approvals.
- **Stress Threshold Capital Level:** Reflects the capital level at or below which contingent capital plan actions need to be implemented. Contingent capital actions could include, but not limited to, the reduction or cancellation of any planned dividend and capital injection from parent.

The Baseline Capital Range and Stress Threshold Capital Level are determined and reviewed at least annually based on the Company's risk appetite, risk profile and stress tests, whilst ensuring that applicable regulatory and rating agency capital requirements are met.

Liquidity Measure

The Company maintains sufficient liquidity during both the normal course of business and under defined liquidity stress scenarios to ensure that sufficient cash can be generated to meet the Company's obligations as they become due.

The Company continuously monitors its liquidity positions as well as liquidity coverage ratios under stress to affirm it has sufficient liquidity to meet its obligations.

Variance Plan Metrics

The Company's business plan is intended to achieve its business strategy and should be consistent with its risk appetite. Hence, any material variance from the Company's business plan is a key metric for monitoring risk appetite. This is measured by metrics driving achievement of the Company's business plan, such as Loss and Expense Ratios, Risk-Adjusted Profitability and Net Investment Income. Additional metrics may be defined over time that are useful to measure the achievement of strategic objectives.

Capital Adequacy

Capital refers to the long-term financial resources available to support the operation of our businesses, fund business growth, and cover financial and operational needs that arise from adverse circumstances. Our primary source of ongoing capital generation is the profitability of our insurance subsidiaries. We and our insurance subsidiaries must comply with numerous constraints on our minimum capital positions. These constraints drive the requirements for capital adequacy for both AIG and the individual businesses and are based on internally-defined risk tolerances, regulatory requirements, rating agency and creditor expectations, and business needs. Actual capital levels are monitored on a regular basis. Using ERM's stress testing methodology, we evaluate the capital impact of potential macroeconomic, financial and insurance stresses in relation to the relevant capital constraints of both AIG and our insurance subsidiaries.

We believe that we have sufficient liquidity and capital resources to satisfy future requirements and meet our obligations to policyholders, customers, creditors and debt-holders, including reasonably foreseeable contingencies or events.

Nevertheless, some circumstances may cause our cash or capital needs to exceed projected liquidity or readily deployable capital resources. Additional collateral calls, deterioration in investment portfolios or reserve strengthening affecting statutory surplus, higher surrenders of annuities and other policies, downgrades in credit ratings, or catastrophic losses may result in significant additional cash or capital needs and loss of sources of liquidity and capital. In addition, regulatory and other legal restrictions could limit our ability to transfer funds freely, either to or from our insurance subsidiaries.

Depending on market conditions, regulatory and rating agency considerations, and other factors, we may take various liability and capital management actions. Liability management actions may include, but are not limited to, repurchasing or redeeming outstanding debt, issuing new debt or engaging in debt exchange offers. Capital management actions may include, but are not limited to, paying dividends to our shareholders and share repurchases.

Generic solvency requirements, capital available to cover regulatory capital requirements

The operations of the AIG API Group are subject to regulatory requirements within the jurisdictions in which it operates. As each entity under the AIG API Group has its own unique regulatory capital regimes, the capital management function seeks to manage capital efficiently whilst meeting regulatory requirements in all countries.

In Singapore, the minimum capital adequacy ratio under the risk-based capital framework regulated by the Monetary Authority of Singapore is 120% for each insurance entity. We have our own internal capital targets built on stress test results to ensure we have a sound capital adequacy ratio meeting our own capital requirements and that of the MAS.

Regulatory capital of the Company is as follows:

At 31 December \$ '000	Company	
	2015	2014
Risk requirement	85,818	119,116
Financial resources	322,908	331,613
Capital adequacy ratio	376%	278%

Financial Instruments

Investment objectives

The primary investment objective of the Company is preservation of capital and provision of liquidity to meet policyholders' liabilities. A secondary objective is the generation of income to the benefit of shareholders.

Investments are well diversified, such that the failure of any single investment would not have a material impact on the overall level of assets. The largest proportion of assets is invested in fixed income debts securities, although the AIG API Group invests also in cash and cash equivalents and equities.

Policies and Processes

Investments of the Company will at all times be in compliance with legal, regulatory and prudent investment standards.

The Company has established an Investment Policy that meets regulatory requirements and is approved by the Board. All investments undertaken by the Company are in accordance with the guidelines set out in the Investment Policy.

The Board has delegated to the IC the authority to oversee the Company's investment activities. The principal role of the IC is to ensure that such investment activities are carried out in accordance with the Investment Policy as approved by the Board. It is also responsible for introducing and monitoring strategic initiatives relating to investments of the Company. The IC is authorised to acquire and dispose of investments directly or delegate this or any of its other authorities either in whole or in part.

The primary focus of the investment process is risk management. The dimensions of risk include asset allocation, asset/liability matching, currency exposure, credit quality, interest rate duration, spread duration, credit risk, liquidity, and diversification.

The Certifying Actuary is a member of the IC, and is consulted on all aspects of the Investment Policy and investment activities of the Company.

The IC reviews, at least annually, the adequacy and relevance of the Company's portfolio and Investment Policy then in force, and approves them or makes recommendation for their amendment.

The IC reports, 4 times a year, to the Board. All decisions of material consequence made by the IC are reported to the Board no later than three months since the making of such decision. A decision of material consequence includes a decision affecting >5% of the invested assets of the Company. The IC will also prepare reports for the Board as soon as, but no later than two weeks after, any investment-related activity of material consequence arises.

The IC establishes procedural standards for any investment manager managing the Company's investments on its behalf. Such controls include process controls, oversight, and segregation of duties. The IC, through regular audits, ensures that any prescribed standards are adhered to by investment managers appointed by the Company.

Information on returns on investment assets and components of such returns

AIG generally receives premiums and deposits well in advance of paying covered claims or benefits. In the intervening periods, we invest these premiums and deposits to generate net investment income that is available to pay claims or benefits. As a result, we generate significant revenues from insurance investment activities.

AIG's worldwide insurance investment policy places primary emphasis on investments in fixed income debt securities of corporations, municipal bonds and government issuances in all of its portfolios, and, to a lesser extent, investments in high-yield bonds, common stock, real estate, hedge funds and other alternative investments.

The majority of assets backing our insurance liabilities consist of short and intermediate duration fixed income debt securities.

Investment strategies are based on considerations that include the local market, general market conditions, liability duration and cash flow characteristics, rating agency and regulatory capital considerations, legal investment limitations, tax optimization and diversification.

Our fixed income debt securities must meet our liquidity, duration and quality objectives as well as current capital, risk return and business objectives. Fixed income debt securities held by AIG international operations consist primarily of intermediate duration high-grade securities, primarily in the markets being served. In addition, AIG has redeployed cash in excess of operating needs and short-term investments into longer-term, higher-yielding securities.
